@KuzKen

PROFILE

Frontend developer specializing in the React ecosystem (Next.js, TypeScript). I have experience in full-stack development (NestJS, PostgreSQL) within startups, which allows me to effectively design application architecture, configure API interaction, and understand server operation. I am focused on creating high-quality UI/UX and clean code.

SKILLS

MAIN STACK:

- React 19, Next.js (App Router), TypeScript, JavaScript (ES6+).
- Tailwind CSS, FSD Architecture, Zustand, Redux, HTML5/CSS3, Git.

ADDITIONAL / BASIC KNOWLEDGE:

- Backend: NestJS, Node.js, Express.
- Database: PostgreSQL, TypeORM.
- DevOps: Docker, Nginx, CI/CD basics.

EXPERIENCE

- **AUGUST 2025 -
JANUARY 2026**

INVITATION

BUILDER

**Invite.kz (SaaS
Platform)**

FRONTEND ARCHITECT / FULLSTACK DEVELOPER

- Architecture & Nx Monorepo: Designed the monorepo structure, dividing the project into isolated applications: Editor (Vite) and Public Viewer (Next.js). Configured Nx Affected so that CI processes are only triggered for changed parts of the project.
- Shared Libraries: Developed shared libraries for code reuse between frontends and backends:
 - Shared Types: Unified TypeScript interfaces.
 - Shared Utils: A set of utilities, including custom validation and formatting logic for phone numbers.
- Public Viewer Application: Developed an invitation viewing module from scratch on Next.js 16. Implemented SSR for SEO optimization.

- Feature Development & Quality Control:
 - Conducted code reviews of the backend and client-side (Vite) implementations, assisted the team with debugging and resolving complex logical bugs prior to release.
 - Implemented Single Audio Manager to control music playback on the client.
- Infrastructure: Set up Docker containers, Nginx configuration, and deployment pipelines. Implemented REST API on NestJS + PostgreSQL.

TECH STACK:

TypeScript, React 19, Next.js 16 (App Router), Vite, Nx (Monorepo), NestJS, PostgreSQL, Docker, Nginx, Tailwind CSS, FSD, Zustand, i18n, GitLab CI/CD pipelines.

- **NOVEMBER 2025 - PRESENT**

PERSONAL PORTFOLIO WEBSITE (Pet project)

FRONTEND DEVELOPER

- Bleeding Edge Stack: Developed a production-ready solution on the latest stack: React 19, Next.js 16 (App Router), and Tailwind CSS 4.
- Advanced UI & Animations: Implemented a custom “Matrix Glitch” effect using requestAnimationFrame and GPU optimization to achieve a stable 60 FPS without using heavy libraries.
- Architecture & i18n: Designed an application using the adapted FSD methodology, configured two-level localization (RU/EN) via middleware and next-intl.

TECH STACK:

React 19, Next.js 16 (App Router), TypeScript, Tailwind CSS 4, next-intl, FSD Architecture, ESLint 9 (Flat Config), Vercel CI/CD.

EDUCATION

- **OCTOBER 2024 - JANUARY 2026**

FULLSTACK DEVELOPER

ATTRACTOR SCHOOL ALMATY

- Course: Fullstack Web Development (JavaScript).
- Thesis project: Development and launch of the MVP commercial platform Invite.kz (full description in the “Work Experience” section).

- **JUNE 2024 - PRESENT**

FRONTEND DEVELOPER

UDEMY

Specialization: In-depth study of the React ecosystem, state management (Redux, Zustand), and modern front-end development practices.
